

Basic Introduction

NTL supplies the Bravo series of duplicators that can back up and print DVD and Blu-Ray discs (BD) and data management software that supports the Bravo series. The Company also offers proposals for using these products in a system through integration. In addition, NTL also supplies server connection type DVD/BD supporting single drives and UNIX/LINUX supporting backup software. The major end users of these products are companies that handle a huge volume of personal information, government agencies, and medical institutions. NTL supplies these products mainly to major system integrators.

Facts & Figures

- Company Established : 1989
